About

MCA graduate and full stack developer shipping MERN apps end to end — React/Next.js + TypeScript frontends, Express REST APIs with JWT and role-based access, MongoDB, Judge0, and Flask ML services.

Education

Master of Computer Applications (MCA) 2024 – 2026
Galgotias University, Greater Noida **CGPA: 8.50**

Bachelor of Science (B.Sc.) 2021 – 2024
CSJM University, Kanpur **CGPA: 7.71**

Relevant coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Technical Skills

Languages	TypeScript, JavaScript, Python
Frontend	Next.js, React.js, Tailwind CSS, Framer Motion, Shadcn/UI, Chart.js
Backend & APIs	Node.js, Express.js, Flask, REST APIs, JWT Auth, Socket.IO, Judge0 API
Database & Tools	MongoDB (Mongoose), Git, GitHub, Docker Compose, Vercel, Postman
Machine Learning	Scikit-learn, Pandas, Jupyter

Projects

AtellixEngine — Coding Interview & Practice Platform Live | GitHub | 2026
Technologies: React, Vite, Node.js, Express, MongoDB, JWT, Judge0 API, Tailwind CSS, Three.js

- Built an Express REST API with cookie-based JWT auth and role-based access (user/admin) for problem authoring, submissions, solved-problem tracking, and playlists.
- Integrated the Judge0 API to compile and run submissions in 4 languages (Python, Java, JavaScript, TypeScript) against test cases, covered by 7 unit tests.
- Developed a responsive React 19 + Tailwind CSS 4 frontend with Framer Motion and a Three.js hero.

AtellixCareer — Career Skill-Gap Planner Live | GitHub | 2026
Technologies: Next.js, TypeScript, Tailwind CSS, Framer Motion, Node.js, Express, MongoDB, Multer

- Built a Next.js + TypeScript app: upload a resume (Multer), pick a target role, and get a skill-gap report against role frameworks.
- Implemented gap scoring (strong/developing/gap per skill + overall readiness score), stored in MongoDB.
- Generated week-by-week learning plans from gap skills, plus a progress dashboard.

AtellixUI — React Component Library & Playground Live | GitHub | 2026
Technologies: React, TypeScript, Tailwind CSS, Framer Motion, Sandpack, Express

- Built a token-driven component library of 67 interactive React/TypeScript components with a searchable, filterable gallery and copyable TSX source.
- Created a two-mode playground: instant local previews plus a Sandpack-powered live React editor with real-time preview.
- Added reduced-motion-aware Framer Motion transitions, dark/light theming, and an Express API serving component JSON for CLI-style distribution.

Experience

Infosys Springboard – Virtual Internship 6.0 Sep 2025 – Dec 2025
MERN Stack Development Trainee

- Engineered **PrepConnect (SkillBridge)** (Live | GitHub), a full-stack platform connecting volunteers and students with nonprofits and mentors.
- Implemented an Express/MongoDB REST backend with JWT auth, volunteer/NGO roles, rate limiting, application tracking, listings, and messaging; Socket.IO and Docker Compose.

IBM SkillsBuild (Edunet Foundation) & AICTE Jun 2025 – Sep 2025
Web Development & AI Intern

- Developed **TensorWage** (Live | GitHub), a salary prediction app: Scikit-learn regression pipeline (R^2 0.85) served via a Flask API, with a React + Chart.js frontend.
- Built a Study Companion platform with task planning, progress tracking, and interactive focus timers.

Certifications

TypeScript, JavaScript – Infosys Springboard | Frontend Web Development – IBM SkillsBuild | OCI Foundations Associate – Oracle
