Internship Report

Front End Web Development Internship

Submitted by

Name: Uditya Pal
University: Galgotias University
Department: School of Computer Application and Technology
Student ID (AICTE): STU681252125c6e81746031122

Internship Details

Internship Title: Front End Web Development
Organization: Edunet Foundation (in collaboration with AICTE & IBM SkillsBuild)
Duration: 6 Weeks
Internship Period: 21st August 2025 – 30th September 2025

---

1. Introduction

The internship on *Front End Web Development* was undertaken under the AICTE–Edunet Foundation initiative in collaboration with IBM SkillsBuild. The objective of this internship was to provide hands-on exposure to modern web development technologies and to enhance practical skills through project-based learning. The program focused on building strong foundations in HTML, CSS, and JavaScript, along with applying these skills to solve real-world problems.

---

2. Organization Overview

Edunet Foundation is a non-profit organization working closely with industry and academic institutions to bridge the skill gap among students. In collaboration with **AICTE** and **IBM SkillsBuild**, Edunet Foundation provides structured internships, mentor-led sessions, and industry-relevant learning paths to enhance student employability.

---

3. Objectives of the Internship

- To understand the fundamentals of front end web development
- To gain practical experience in designing responsive and user-friendly web interfaces

- To apply theoretical knowledge to a real-world project
- To improve problem-solving, self-learning, and project presentation skills

---

4. Internship Structure & Weekly Activities

Week 1: Orientation & Platform Familiarization

- Orientation session on internship structure
- Registration on IBM SkillsBuild platform
- Overview of learning plan and project guidelines

Week 2: Technical Learning & Project Initiation

- Front end development concepts
- Selection and understanding of project topic
- Initial project planning and design

Week 3: Development & Mentor Interaction

- Continued self-paced learning
- Project development work
- Interaction with mentors and query resolution through Q&A sessions

Week 4: Technical Sessions & Query Resolution

- Advanced concepts discussion
- Refinement of project features
- Mentor feedback and improvements

Week 5: Project Completion

- Finalization of project functionalities
- Testing and debugging
- Preparation of project presentation

Week 6: Project Submission

- Submission of project presentation (PPT)
- Final review and internship completion

---

5. Project Overview

Project Title: Smart Study Planner

Problem Statement

Students and individuals often face difficulties in managing academic and personal tasks effectively. Existing tools are either too complex or lack essential features, leading to poor organization, missed deadlines, and increased stress. There is a need for a simple, visually appealing, and user-friendly web application that helps users plan, track, and manage their tasks efficiently.

---

6. System Development Approach

Technologies Used

- **HTML5:** Structure of the web application
- **CSS3:** Styling, layout, and responsiveness
- **JavaScript:** Dynamic behavior and interactivity

Design Approach

- Clean and user-friendly interface
- Mobile-responsive layout
- Modular separation of HTML, CSS, and JavaScript files

---

7. Algorithm & Deployment

Step-by-Step Procedure

1. Requirement analysis and UI planning
2. Designing the frontend layout using HTML and CSS
3. Implementing interactive features using JavaScript
4. Task creation, prioritization, and progress tracking
5. Testing for responsiveness and cross-browser compatibility
6. Deployment using free hosting platforms

Deployment Platform

- GitHub Pages / Vercel

---

8. Result

The *Smart Study Planner* was successfully developed as a responsive and interactive web application. It allows users to create, manage, and track tasks efficiently. The application provides visual feedback through progress indicators and improves productivity through a simple and engaging interface.

---

9. Conclusion

The internship provided valuable exposure to front end web development and real-world project implementation. By working on the Smart Study Planner, practical knowledge of HTML, CSS, and JavaScript was strengthened. The program enhanced technical skills, self-learning ability, and confidence in building complete web applications.

---

10. Future Scope

- Integration of user authentication and cloud-based data storage
- Addition of recurring tasks and subtasks
- AI-powered task scheduling and recommendations
- Real-time browser notifications and reminders

---

Acknowledgement

I would like to express my sincere gratitude to **Edunet Foundation**, **AICTE**, **IBM SkillsBuild**, and the mentors for providing this opportunity and continuous guidance throughout the internship period.
