GALGOTIAS UNIVERSITY, GREATER NOIDA

INDIA

ACKNOWLEDGEMENT

I express my sincere gratitude to Edunet Foundation for providing me with the opportunity to undertake a six-week internship in Front End Web Development under the AICTE initiative in collaboration with IBM SkillsBuild. This internship has been an invaluable learning experience that allowed me to gain practical exposure to modern web technologies. I would like to thank the mentors and coordinators for their continuous guidance, constructive feedback, and encouragement throughout the internship period. Their insights helped me improve my technical and problem-solving skills. I am also thankful to Galgotias University and respected faculty members for their academic support. Lastly, I thank everyone who directly or indirectly contributed to the successful completion of this internship.

I am thankful to the mentors and team members at AICTE–Edunet for their constant guidance, support, and encouragement throughout the internship period. Their valuable feedback and technical insights helped me improve my skills in HTML, CSS, JavaScript, and other web development concepts.

I would also like to thank my college/institution and faculty members for their support and motivation, which enabled me to successfully complete this internship.

Lastly, I am grateful to everyone who directly or indirectly contributed to the successful completion of my internship and made this learning journey enriching and memorable.

COMPANY PROFILE

About the Company:

Edunet Foundation is a non-profit organization committed to bridging the gap between academic learning and industry requirements. The foundation works closely with educational institutions, government bodies, and global technology partners to provide students with industry-relevant skills through structured training programs, internships, and mentorship initiatives.

Edunet Foundation collaborates with the All India Council for Technical Education (AICTE) to implement nationwide internship and skill-development programs aimed at enhancing student employability. These programs focus on emerging technologies and practical learning experiences aligned with current industry standards.

As part of this initiative, Edunet Foundation partners with IBM SkillsBuild, a global digital learning platform that provides free access to high-quality technical and professional courses. IBM SkillsBuild supports learners in developing foundational and advanced skills through self-paced modules, hands-on projects, and expert-led sessions.

Through its AICTE-approved internship programs, Edunet Foundation plays a crucial role in preparing students for real-world challenges by promoting experiential learning, innovation, and continuous skill enhancement.

INTERNSHIP OBJECTIVE

Internship Objective – Full Stack Web Development

The primary objective of this internship was to gain **practical knowledge and hands-on experience in Front End Web Development** through structured learning and real-world project implementation. The internship aimed to bridge the gap between theoretical concepts learned in academics and their practical application in building modern, responsive web applications.

The specific objectives of the internship are as follows:

- To develop a strong understanding of **core front end technologies**, including **HTML5, CSS3, and JavaScript**.
- To learn the principles of **responsive web design** and create user-friendly interfaces that work efficiently across different devices and screen sizes.
- To apply theoretical knowledge to a **real-world project**, thereby improving practical problem-solving and implementation skills.
- To understand the complete **frontend development workflow**, including requirement analysis, UI design, coding, testing, and deployment.
- To enhance **self-learning abilities** through guided practice, online learning platforms, and mentor support.
- To improve **professional skills** such as time management, task planning, and project presentation.

Outcome:

CONCLUSION:

The **Front End Web Development internship** conducted under the **AICTE–Edunet Foundation initiative** in collaboration with **IBM SkillsBuild** was a highly valuable and enriching learning experience. This internship provided practical exposure to real-world web development and helped bridge the gap between academic knowledge and industry requirements.

During the internship, strong proficiency was developed in **HTML5, CSS3, and JavaScript**, along with an understanding of responsive design principles and user interface development.

Working on the capstone project **"Smart Study Planner"** enabled the application of theoretical concepts to a real-life problem, enhancing skills in planning, designing, coding, testing, and deployment of a web application.

The internship significantly improved problem-solving abilities, logical thinking, and self-learning skills. Interaction with mentors and structured learning through the IBM SkillsBuild platform helped in gaining industry-relevant insights and best practices. Overall, this internship strengthened technical foundations, boosted confidence in frontend development, and prepared for future opportunities in web and software development.

The knowledge and experience gained during this internship will be highly beneficial for future academic projects and professional growth in the field of web development.
